

# Attention Unama'ki Salmon Fishers

Please report the river, date, and number of salmon kept between June and December, 2016 to your local fishery department by **January 31, 2017.**

Please indicate whether retained salmon were large (63 cm or larger, 24 inches or larger) or small (less than 63 cm or 24 inches.)

It's our responsibility to report our catches so they can be included in scientific assessments conducted in February.
